

An Exchange of Ideas on:

Timed Behavior and Temporal Cognition

*(to celebrate the PhD defense of Tadeusz W. Kononowicz)*

19 June 2015

University of Groningen  
M.00.55; Grote Kruisstraat 2/1

11:00-11:30	Tadeusz Kononowicz (CEA-Inserm Cognitive NeuroImaging Unit, Gif-sur- Yvettes, France)	Single Trial Beta Oscillations Index Time Estimation
11:30-12:00	Anne Kosem (MPI for Psycholinguistics, Nijmegen)	The Tuning of Brain and Mental Timing to the Environment
12:00-12:30	Atser Damsma (Psychology, RUG)	Pupil Dilation Reflects Unattended Violations of The Beat
12:30-13:30	Lunch	
13:30-14:00	Laetitia Grabot (CEA- Inserm Cognitive NeuroImaging Unit, Gif-sur- Yvettes, France)	An MEG Study on Individual Biases in Temporal Order Perception
14:00-14:30	Sander Los (Psychology, VU Amsterdam)	The Hazard Fallacy
14:30-14:45	Coffee break	
14:45-15:15	Wanja Mossing (BCN Research Master, RUG)	Active Perception in Human Interval Timing
15:15-15:45	Hedderik van Rijn (Psychology, RUG)	Continuative Timing Theory, a new perspective on the perception of time
